## **HALOMAG™ CORRAL**

**Multi-Carrier Capable Water Tower  
Solution**

**100% Magnetic - No Welding  
Fast Installation**

---

**ESTECH is a national leader of magnetic solutions for the telecom industry. We are proud to announce a truly revolutionary method for telecom carriers and vertical real estate partners to populate water towers with multiple carriers and no welding. This is a patented solution that approaches water corral installation in a way never seen before!**

---

### **Why use HaloMAG™ ?**

- 100% magnetic installation. No welding, no costly repairs of coating system of the interior or exterior
- Reduction in installation cost
- Avoids welding related issues, such as coating failures and costly tower renovations from damage
- Engineered to meet the requirements for you installation, complete with two structural analysis
- Multiple diameters available to meet horizontal offset for frequency interference
- Capable of multiple carriers, allowing for colocation and additional revenue streams
- Opening the door to water tower owners that traditionally refuse co-location due to damage from welding
- One day installation - once at site location, our mount is removed from transport, safely and efficiently assembled on the ground, including mounting carrier equipment and sectors.
- Once ground installation in complete, the entire structure is lifted and guided onto the roof of the water tower. Estech Hovetbolt™ system allows for each magnetic foot to be positioned on the tank surface before full magnetic contact is made, allowing for ease of placement of each magnetic foot.
- Installation can be completed within one day vs. days and weeks to weld and re-coat damaged paint areas
